ACADEMIC HISTORY

2020 - 2024

Sebelas Maret University | Surakarta, Indonesia

Bachelor of Science in Computer Science

- GPA: 3.81 / 4.0 [[transcript](#)]

Aug 2022- Dec 2022

Startup Campus Kampus Merdeka | Indonesia

Backend Track

- Result: A (95.95/100) [[certificate](#)]

WORK EXPERIENCE

FullStack Developer | 2024 - Now

Raihmimpi Company

- Maintained and enhanced an existing web platform by developing and optimizing key features such as transaction management, blog module, and fundraising campaign systems.
- Successfully integrated various tracking and analytics tools including Matomo, Meta Pixel (Facebook Pixel), Google Tag Manager, and other third-party event tracking for better user insight and performance analysis.

FullStack Developer | 2018 - Now

Auraderma Company

- Designed and developed a web-based application using Laravel, Bootstrap, and jQuery to support core business operations including product purchasing transactions, sales reporting, medical record management, and inventory tracking.
- Implemented intuitive interfaces for transaction processing and reporting modules, enhancing user efficiency and accuracy in daily operations.
- Developed secure and structured modules for storing and retrieving patient medical records, ensuring data privacy and integrity.
- Built real-time inventory tracking features to monitor stock levels and prevent shortages or overstocking.

BackEnd Developer | Jun 2019 - Agu 2019

Bukalapak Company

- Developed scalable and efficient RESTful APIs for Bukalapak's career site using Lumen (Micro-framework of Laravel), focusing on performance, lightweight architecture, and security.
- Handled core backend functionalities including job listing, application submission, user authentication, and integration with third-party services.
- Collaborated closely with frontend developers and product teams to ensure API endpoints aligned with UI requirements and delivered optimal performance under production loads.

PROJECT

Website Profile Desa Glagahwangi | Jul 2023 - Agu 2023

- Built a dynamic and responsive village profile website for Desa Glagahwangi using HTML, Laravel, Tailwind CSS, JavaScript, and MySQL as the database.
- Developed core features such as news & announcements, government structure, demographic data, gallery, and contact information to support transparency and public access to village services.
- Implemented a backend admin panel for managing content, enabling village officials to easily update website information without technical expertise.

JustPrint | Jul 2022 - Agu 2023

- Developed a cross-platform mobile application using Flutter and Firebase, featuring real-time document upload, secure cloud storage, Google Maps integration for locating and tracking print locations, as well as seamless online payment processing with live order status updates.
- Designed and implemented a responsive admin dashboard to manage transactions, monitor orders, and generate financial and operational reports, ensuring consistent performance and user experience across Android platforms.

Karisma Ebilling | Des 2020 - Feb 2023

- Developed a web-based application for managing and tracking invoice approvals within Karisma Flight Support using Laravel, Bootstrap, and MySQL.
- Implemented role-based access control to accommodate various levels of approval including finance staff, supervisors, and management.
- Designed and built modules for invoice submission, multi-level approval workflows, status tracking, and history logging to ensure transparency and accountability.

Ground Handling Service | Sep 2020 - Jan 2022

- Developed a web-based system using Laravel, Bootstrap, and MySQL to manage flight scheduling, including aircraft availability and crew assignments.
- Built structured modules for passenger manifests, crew data, and maintenance tracking, enabling centralized and efficient operational oversight.
- Implemented a maintenance cost management feature to log service history, parts usage, and cost breakdowns, supporting better budgeting and transparency.

Fitzroy App | Jan 2020 - Juli 2021

- Developed a comprehensive Employee Self-Service (ESS) mobile application using Flutter, enabling employees to independently manage HR tasks such as leave requests, payslip access, and pay advances.
- Built modules for work order scanning and tracking, including barcode integration and real-time status updates to streamline operational workflows.
- Designed a modular and responsive UI with role-based access and offline-first capability, ensuring consistent performance across Android devices and real-time data sync via backend API.

Lantas Polda | Apr 2020 - Agu 2020

- Developed a web-based system using Laravel, Bootstrap, and MySQL to record and monitor financial aid distribution to drivers under Polda Metro jurisdiction.
- Designed structured modules for beneficiary data, aid amounts, and distribution tracking by region, ensuring accurate and organized records.
- Implemented role-based access control and real-time reporting dashboards to support secure data entry and transparent monitoring across multiple areas.

SKILLS

- | | | |
|--------------|--------------|---------------|
| ◦ Bootstrap | ◦ Java | ◦ Python |
| ◦ C# | ◦ Javascript | ◦ React.js |
| ◦ CSS | ◦ JQuery | ◦ Redis |
| ◦ Express.js | ◦ Laravel | ◦ SQL Server |
| ◦ Flutter | ◦ MySQL | ◦ Spring |
| ◦ Git | ◦ Node.js | ◦ TailwindCSS |
| ◦ HTML | ◦ PHP | ◦ Vue.js |
